Color Schemes

Find photos that clearly illustrate two different color schemes. Choose from: monochromatic, complementary, analogous, accented neutral, or triad.

In the table below, replace the words "Color Scheme" below with the color scheme you are illustrating and insert your photo in the table. Write a short description of the photo.

Color Scheme

Insert picture illustrating the element of line in a garment.

Write a short description of the photo.

Complementary

Here is an example of an outfit utilizing a complementary color scheme. The orange color of the turtleneck shirt and trousers is on the opposite end of the color wheel of that of the blue color of the jacket and purse. The contrasting colors cause the wearing to easily attract attention in the field of view for any onlooker.

Color Scheme

Insert picture illustrating the element of line in a garment.

Write a short description of the photo.

Analogous

This photo displays a set of clothing modeling an analogous color scheme. The green color of the jacket and heels, the yellow A-line skirt, and yellow-greenish top are three colors that are adjacent on the color wheel. If the skirt was of a green hue with a different shade, tint, or tone of that of the other articles of clothing, the outfit could easily follow a monochromatic color scheme.
